BIOSCRUB™ 2 STEP PROCESS

ALL NATURAL. 100% SAFE. DISINFECTION & SANITIZATION

THE HIGHEST LEVEL OF DEEP CLEANING & DISINFECTING AVAILABLE

Surfaces are hotspots for harmful and contagious microorganisms, such as Bacteria and Viruses, that can have a negative impact on everyone's health. As such, cleanliness and helping to protect against harmful contaminants are of the utmost importance to staying healthy and safe. A regimented deep cleaning, sanitization and disinfection of all surfaces and spaces, including both high and low touch/traffic points, is the most effective method in combating and reducing the spread of unwanted and harmful Bacteria and Pathogens. This will utlimately help in the prevention of such things as colds, flu, pneumonia and various other infections.

HOW IT WORKS

HIGHLY EFFECTIVE 2 STEP DISINFECTION AND PROBIOTIC CLEANING PROCESS

1

Benefect Decon 30 is our added value disinfection product of choice for BioScrub's innovative 2 Step Process. It provides thorough disinfection to high traffic/touch point surfaces such as; door handles and counter tops, removing all harmful and potential bacteria, viruses, germs and microorganisms. Benefect has been preselected by Health Canada as a disinfectant against COVID-19. It also meets the EPA's criteria for use against SARS-CoV-2, the virus that causes COVID-19. Benefect

2

The Bioscrub™ Fogging process is not only custom tailored to overtake and significantly reduce the number of live pathogens, but it is also all natural and 100% safe. This final layer of probiotic will not only increase the efficacy of the Benefect disinfectant, but it will also provide an added layer of protection and cleanliness and help maintain an overall healthy environment for an extended period of time. Bioscrub™ is 100% safe for children, pets and adults and has no negative effects on the respiratory system.

FACTS & INFORMATION

Have Questions? We Love To Educate And Are Here To Help!

Learn more about our latest addition and added value disinfectant product of choice for our 2 Step BioScrub™ Process

- No synthetic chemicals
- No label warnings or precautionary statements
- No PPE required
- No evacuation of building occupants required
- No rinsing or wiping required, even on food contact surfaces

Q. Can you just disinfect a surface?

A. Yes, as long as the surface to be disinfected is not excessively dirty. If this is the case and debris is a physical barrier, then using BioScrub's probiotic as an added first step is highly reccommended to "pre-clean", ensuring the biofilm, dirt and harmful Microorganisms are broken down and removed. This will allow Benefect to be applied properly and disinfect to it's full potential. The Benefect Decon 30 disinfectant is applied to all high traffic touch points. Following our thorough disinfection process, the next and final step provides an added layer of protection to all surfaces with our one of a kind BioScrub™ Fogging technology. This unique process increases the efficacy of the disinfectant that has been applied, adding an additional layer of protection and cleanliness, promoting an overall healthier environment for an extended period of time.

Q. Why is there a lemon and thyme smell when the disinfectant is first applied?

A. The scent is a direct result of the botanical ingredients that are active in helping to kill germs on surfaces unlike other products that use fragrances that are synthetic and do not contribute to the efficacy of the product. The fragrance in the Benefect is not long lasting once applied. Like the probiotic cleaning, Benefect remains on surfaces for a period of time and is a no-rinse, no-wipe product that will disapate over time, leaving no residue and is ECOLOGO Certified (has a reduced environmental impact).

BioScrub™

Q. Why did BioScrub™ choose Benefect as the disinfectant of choice to compliment their 2 step process?

A. BioScrub™ uses an all natural, 100% safe probiotic solution to deep clean and sanitize any type of surface and space. Our innovative process and technology is effective at helping remove and protect against harmful Bacteria, Viruses and other toxins that we can encounter daily. As Benefect stands to have the highest safety rating from Health Canada and is noted to be the only authenticated botanical disinfectant technology in the world and is all natural and 100% safe, there was no question this would be a perfect fit for BioScrub™ .

Benefect Decon 30 Disinfectant has been chosen specifically for its botanical antimicrobial technology. It is registered with the Environmental Protection Agency (EPA) as a disinfectant that kills 99.99% of Bacteria, Viruses & Fungi (Mold) and is suitable to be used in residential or commercial applications. The EPA also reviews & classifies all antimicrobials for Acute Toxicity for all routes of human exposure (skin, inhalation, eyes and ingestion). Decon 30 has not been shown to have any adverse effects and has a Category IV rating (the lowest toxicity profile allowed by law). Benefect Decon 30 does not contain any carcinogens, mutagens or reproductive toxicants and is free of synthetics. This product is free of synthetic fragrances, dyes and ammonia and chlorine.

Product Name	**Benefect Botanical Decon 30**
Foreign Identifier	**EPA 84683-3-74771**
